### About This Game

A pre-alpha demo of Border Patrol, a VR game where the player begins a new job as booth operator at an AI travel border. Checkpoints have been setup to conform with recently instated AI travel restrictions in the region. Interact with and manage the AI travelling through the area, ensure only valid Robots pass through, mistakes will have consequences. Take on a key role driving a branching narrative based around your encounters.

The demo gives an early preview, featuring a single day giving an introduction to the world and operating the booth.
